

Akers' Long Shots Lead Cats To 51-26 Win Over Georgia

Ruppmen Lead Throughout Tilt, Meet Tech Tonight

By JIMMY BROWN
Kernel Sports Editor

Kentucky's Wildcats, rebounding from their six-point defeat at the hands of Tennessee Saturday night, took it out on Georgia's Bulldogs last night to the tune of a 51-26 lacing in a game played at Athens.

The Cats, who tonight meet the Georgia Tech Engineers, regained what prestige, if any, they lost at Knoxville, by their sound thrashing of the Georgians. Kentucky jumped far out in front from the start and never was either headed or threatened. The score could very easily have been much higher had not Rupp played his reserves throughout a large part of the game.

Last night's win, the Cats' seventh against two setbacks, raised the Blue's Southeastern conference standing to the .500 mark, with a leap record of one win and one loss.

STAKER AKERS IN FORM

The best part of the game from Kentucky's standpoint, however, was the return to form of two Blue performers who were in a slump and had not been playing the type basketball they were capable of playing. They were Marvin Akers, long shot specialist whose heaves from far out couldn't seem to find the basket in the last two games, and Captain Carl Staker, who has only recently begun to show the form that has caused him to see plenty of service for the past two years.

PLAY BY PLAY

Brewer opened the scoring for the Cats with a free throw, followed by a long shot by Akers. Brewer and White stretched the lead to

MARVIN AKERS . . . gathered 11 points to lead Cats over Georgia last night.

7-0 with two fielders, and Akers drove in for a crisp to make it 9-0.

Spruill's long one broke Georgia's scoring drought, but the Cats ran the score to 16-2 before the Bulldogs tallied again. Staker made it 14-2 with a crisp, a free throw, and a rebound shot, and White's follow shot made the score read 16-2, before Moore acquired Georgia's second fielder, a long from the side.

White tossed one in from the side, and followed it with a gratis toss, and Solmes hit a free throw, followed by Moore's long shot to make the score 19-7 midway of the first half.

Akers cracked one from far out to run the score to 21-7 but at this point Georgia's Moore took over and closed the gap somewhat with two looping long shots, and the score was 21-11. Akers added a long, and Moore garnered a crisp to make the score board read 23-13 with three minutes left in the first period. Allen registered his first fielder of the game with a set shot from the side, and Brewer counted on a beautiful pivot shot and then dropped in a foul shot. The half-time gun found the Cats holding a 15 point lead, 28-13.

SECOND HALF

The Cats opened the second half with a bang as Staker dropped through two free tosses and Tico rebounded a shot to give the Ruppmen a 32-13 advantage. Tico again counted, this time from the side, to follow Roland's gratis fling and stretch the margin to 34-14. Moore and Spruill's gratis fling and stretch the margin to 34-14. Moore and Spruill's gratis fling and stretch the margin to 34-14. Moore and Spruill's gratis fling and stretch the margin to 34-14.

Georgia tallied next when Keuper tossed in a rebound, but Akers matched it with a looping long shot, and King added a crisp, and Kentucky led 44-19 midway of the period.

Phelps and Moore connected for the Bulldogs, but Back in the game for England, intercepted a crisp and dribbled in unmolested for an easy one. King followed it with a side shot, making the score stand 48-23.

Back was successful on a free try, Lander completed the Cat scoring with a pivot shot. Roland, Bryant, and Moore finished Georgia's scoring with a free throw each. Final score—51-26.

NOT PART OF THE UK CAMPUS . . . but inhabited by former UK students is Maxwell field, Ala., where army planes like those shown above fly.

Allen Will Head Zoology In Funkhouser Absence

Graduate Dean Will Do Research In Central America

Dr. W. R. Allen has been appointed head of the department of zoology during the absence of Dr. W. D. Funkhouser, who will be on sabbatical leave next semester.

Dr. Funkhouser, who will engage in research work during his leave plans to spend the major part of his time in the jungles of Central America, especially in the region of Guatemala, Honduras, and Yucatan, and in the mountains of western Mexico.

Accompanied by his wife, Dr. Funkhouser will search for rare species of snakes and insects. Though he had originally planned to go to Africa, world conditions make such a trip impossible, he explained.

Dr. Allen will have charge of the administrative work of the department, and lectures in zoology. A University professor since 1922, Dr. Allen received his A. B. degree from Indiana university in 1913, M. A. in 1914, and Ph. D. in 1920. He began teaching in 1914 at Kansas State college in Manhattan, Kan., followed by a period during which he served as teacher and ward principal in the elementary schools in Indiana. Later he acted as an instructor at Indiana university, Cornell university, and as an assistant professor at the University of Akron.

HIS SOCIETIES
The new head is a member of the American Association for the Advancement of Science, Kentucky Academy of Science, American Society of Zoologists, American Malacological society, American Limnological society, Fellow American Geographic society, American so-

ciety of Ichthyologists and Herpetologists, American Fisheries society, Ecological society, and American Microscopical society.

Dr. Allen was a travelling fellow in South America for the University of Illinois during 1918-19, and for the University of Indiana during 1920-21. He is the author of various technical articles in zoological papers as well as two books, "Guide to Study of Zoology," and "Nature Sketchbook."

Dr. Funkhouser obtained his A. B. degree from Washington college, Crawfordville, Ind., in 1905, Sc. D. in 1929, M. A. from Cornell in 1912, and Ph. D. in 1916. He served as an instructor in the Indiana high schools until 1918, at which time he was made head of the department of zoology and entomology at the University. In 1925 he was also made professor of anthropology and dean of the graduate school.

He is a member of the American Association for the Advancement of Science, Entomological Society of America, Kentucky Academy of Science, Kentucky Educational association, American Zoology society, American Anthropology society, Kappa Sigma (past district grand master of Kentucky and Tennessee), Phi Beta Kappa, Sigma Xi, Kentucky Research club, Rotary club, Kentucky Archeological society, Secretary Southeastern Athletic conference, Secretary Conference of Deans of Southern Graduate schools, and a member of the Filson club.

Author of more than 300 books, reports and technical papers, he has written several on Kentucky, including "Wild Life in Kentucky," "Birds in Kentucky," and "Kentucky Prehistory," the latter being written in collaboration with Dr. W. S. Webb, head of the physics department.

Reviewer Applauds Wetzel, Concert Band Cornet Soloist

By WILYAH GRAVES

Raymond Wetzel, arts and science freshman from Parkersburg, W. Va., showed good technique and interpretation as cornet soloist Sunday afternoon with the University of Kentucky Concert Band, under the direction of Prof. Charles V. Magurean, playing in Memorial Hall.

A smooth blend of instruments was maintained throughout the entire program, careful attention being paid to dynamics at all times. The brass section gave an outstanding performance, and the bass instruments brought out each of the counter melodies most artistically.

The regular program was preceded with the playing of "The Star-Spangled Banner."

The first portion of the concert contained "Mannin Veen—A Manx Tone Poem," by Hayden Wood, and "The Roman Carnival Overture" by Hector Berlioz.

Of the four movements of "Mannin Veen," "The Good Old Way," "The Manx Fiddler," a reel; "Sweet Water in the Common"; and "Manx Fisherman's Evening Hymn," the first was the most impressive. The music was moving, and stage-producing.

"The Roman Carnival" overture was performed well in a standard arrangement.

The second section was devoted to Mr. Wetzel's cornet solos, which were accompanied nicely by the band.

Selections included "Napoli," known as "The Familiar 'Punkin' Polka"

of Herman Bellstedt, and the well known "Lost Chord" by Arthur Sullivan. Mr. Wetzel's rendition of both selections was excellent.

The third portion of the concert contained a variety of musical selections. First, Dvorak's "New World Symphony" was played. This work, one of the finest in modern music, and particularly the "Goin' Home" portion, was well played, but disappointingly received.

The highlight of the afternoon was "Cypress Silhouettes," a modern rhapsody of the deep South, by David Bennett.

Dance Petitions Must Be Submitted By February 5

Petitions for dances to be given the second semester must be turned in to the social committee of the Student Government association before February 5, Joe Gayle, chairman, announced. These petitions are to be submitted to the office of the dean of men.

The constitution of the association required that all organizations planning dances or other social functions on the campus have the approval of the social committee.

Other resignations included those of W. E. Clark, instructor in English, who has taken a position in Georgia; James H. Leech, laboratory assistant in the psychology

Quarter System At UK To Take Effect In June With No Change In Fees

Law Finals Begin Today, Others To Start Saturday

Schedule Printed For All Colleges Except Law

Final examinations for the current semester will begin today when the law college has its first term test.

The campus Civilian Pilot Training course will hold its final examinations for the ground classes at 7 p.m. tomorrow in room 203 of the Armory building, the military department announced.

Saturday, the regular schedule of examinations for all colleges except law will begin.

The law college schedules its examinations so that students have a day between each test in which to study.

The final examination schedule for all colleges, except law, as released yesterday by the registrar's office, states that the tests will begin at 8:30 a. m. Saturday and end at 5 p.m. the following Saturday.

Classes will be examined according to the following schedule:

Saturday, January 24, first-hour classes

Monday, January 26, second-hour classes

Tuesday, January 27, third-hour classes

Wednesday, January 28, fourth-hour classes

Thursday, January 29, fifth-hour classes

Friday, January 30, sixth-hour classes

Saturday, January 31, seventh and eighth hour classes.

Monday, Wednesday, and Friday classes will be examined in the morning, beginning at 8:30 o'clock, and Tuesday, Thursday, and Saturday final examination. A further provision states that no written examination

day classes, in the afternoon, commencing at 2 o'clock. Classes meeting four times a week will be examined in the morning.

Under the University marking system, letter grades are given on both the examinations and as final grade for the course.

The grade "A" stands for excellence and is valued at 3 points per credit; "B" stands for good and is valued at two points per credit; "C" is average and is good for 1 point per credit; "D" is unsatisfactory, indicating a deficiency, and merits no points although it gives credit for graduation, if with such credit the student's standing is 1 or more.

A grade of "E" indicates failure and gives no points or credits toward graduation. The "I" mark indicates that some part of the term's work remains undone and must be completed within one month after reentrance in school. If credit is to be gained.

The quotient obtained by dividing the number of points by the number of credits indicates a student's standing.

According to examination rules, a student who has been absent more than one-fourth of the total number of class exercises is barred from graduation unless he has been absent for three hours.

Graduate students are required to take examinations under the same rules as those governing undergraduate students.

Instructors should report conflicts to the registrar's office and recommend a satisfactory date for the special examination, the announcement states, which adds that changes for cause other than conflicts will not be considered unless recommended by the dean of the college.

CLASSES WILL MEET OFTENER

Faculty Outlines 14-Point Program For Duration

The quarter system, by which students may complete their college education in three years, will go into effect at the University in June, President Herman L. Donovan has announced.

Under the new set-up the year will be divided into four 12-week periods, rather than two 18-week winter terms and two summer sessions.

"I regard this step the most important thing we have done this fall," President Donovan said yesterday in an exclusive interview with The Kernel.

THREE-YEAR COURSE

Under the coming set-up students may attend three quarters annually and finish in the normal four years, but by attending all four quarters may finish in three years. The faculty recommended that the young men and women remain in the University four quarters per year to enable them to graduate in three years.

With the coming of the quarter system, the Reserve Officers' Training corps will be maintained during the summer of 1942.

Students now taking 18 semester hours would probably take two-thirds of each quarter, making 12 hours of credit. Classes will probably meet daily or five times a week for 3-hour courses, and four times a week for two-hour courses. Correspondence work will not be affected.

The schedule is being worked out by Dean Henry H. Hill, Dean Paul P. Boyd, Dean William S. Taylor, and Registrar Leo Chamberlain.

FEES THE SAME

The matriculation fee for the entire year will be the same, but divided among the quarters. The summer quarter fee will remain unchanged, and the regular \$100 that is paid for the present two terms will be divided among these terms.

The holiday schedule will not be disrupted by the plans, since the fall quarter will be finished immediately prior to the Christmas vacation. Spring vacation will fall between winter and spring quarters, about the last of March and the first of April. This will mean that the holidays will not be at Easter, unless a coincidence causes them to fall at the same time.

The fall term will probably start later and the summer term run longer, Dr. Donovan said.

"The faculty of the University has been studying for more than two months how the University could be of greater use to our country during this period of war and national emergency," Dr. Donovan said.

"It desired to have a program of action rather than a 'laissez-faire' policy. After many conferences and much study the following program evolved, which is now to be regarded the University program during the war emergency."

In the program that the University has laid out for greater cooperation in the emergency is the pledge to provide a greater educational effort by both faculty and students without unnecessarily sacrificing the morale building values of recreation, athletics, and social life.

"The University has made and will continue to make extensive contributions of leadership in the fields of agriculture, homemaking, engineering, teaching, law, and commerce, as well as in the arts and sciences, and in the strengthening and enrichment of civilian life throughout the state and nation through alumni, faculty, and students," the faculty stated.

HOW IT FITS CRISIS

"The quarter system," it pointed out, "fits naturally into the present emergency, providing shorter cycles of completed courses, permitting students to enter the armed services with a minimum loss of training and facilitating the offering of special courses now or later."

The change in the University set-up is only one of the plans made by the Faculty. Thirteen other policies of cooperation in aiding the nation were reported by the faculty.

2. The University Faculty will serve through the emergency as an all-embracing War committee. From time to time it will set up other committees to plan and execute programs it deems essential and desirable.

(Continued on Page Four)

Over 100 Kentucky Educators To Attend State Conference

More than 100 Kentucky educators are expected to attend the Kentucky Association of Colleges and Secondary Schools conference on Higher Education and the War to be held on the University campus Wednesday.

The meeting will open at 10 a.m. in the Union building, with Francis S. Hutchins, president of Berea college, and chairman of the commission on college and universities, presiding.

The meeting is the outcome of the National Conference of College and University Presidents on Higher Education and the War, called during Christmas vacation by John S. Studebaker, United States Commissioner of Education.

Dr. Henry H. Hill dean of the University, attended the vacation meeting in Baltimore and will report on that conference at the Kentucky meeting Wednesday.

Some of the topics on the agenda for Wednesday are reduction of entrance requirements; shortening of the college year; lengthening of the school week; shortening of vacations; lengthening of the summer session; modification and condensation of courses; elimination of some courses, the quarter system, special courses, in addition to engineering, chemistry, physics, production management, for which government aid should be asked; training of types of army and navy personnel, such as engineering corps, chemical warfare service, quartermaster corps; removing of educational handicaps of men rejected in the draft; improvement of health education; college women and the war; problems of student and civilian morale; supply of teachers for schools and colleges; lessons from 1917-18; budgetary problems; cooperation among colleges; and after-the-war problems.

Pershing Rifles Elect Taylor

Royce R. Taylor, arts and sciences senior from Lexington, was elected second lieutenant of Company C-3, Pershing Rifles, at the company's regular monthly meeting Tuesday.

Captain A. J. Spare announced yesterday. He will succeed C. P. Taylor, Beaver Dam, who resigned the position to join the army air corps. The latter Taylor will report to Maxwell field, Ala., for preliminary training, January 23.

C. Edwin Barnes, sophomore from Louisville, was appointed company staff sergeant at the same meeting.

ROTC HONORARY INITIATES FOUR, PLANS DANCE

May, Winn, Black, Harney Inducted Friday Night

Initiation of four pledges to Scabbard and Blade, national honorary military fraternity for ROTC students, was held Friday night at the Lexington armory on the old Frankfort pike.

Those initiated were Roy May, Winchester; Harold Winn, Marion; William Black, Louisville; and Glenn Harney, Cynthiana. A special initiation will be held Tuesday night for Gene Bryant, Lexington, who was unable to attend Friday's meeting.

At the regular meeting Tuesday night, plans were formulated for the annual Scabbard and Blade dance to be held in February. Capt. J. Ivan Potts announced that a "name band" would be brought to Lexington, if possible, for the dance, which would have as its theme "National Defense." All profits from the dance are to be put into National Defense bonds.

The meeting will be held at 7:15 p.m. Tuesday. Captain Potts announced.

Three Win Lances Scholarships

GIVENS DIXON

Three scholarships will be given by Lances, junior men's honorary, this year instead of the usual one \$50 award. It was announced yesterday by Bob Hillenmeyer, president of the group.

Winston Gardner, commerce junior, will receive the regular \$50 award, and Roy Hunt and Givens Dixon, sophomore and junior, will receive awards of \$25 each.

ROY HUNT

The increase of awards this year is due to the excellence and worthiness of the applicants, Hillenmeyer said. The additional funds were made up largely by voluntary contributions from individual members of the organization.

WINSTON K. GARDNER

The annual second semester scholarships are presented on the basis of goodness, scholarship, personal worthiness, and leadership ability, the president said.

Other officers of the organization are John Kerr, treasurer; Terry Noland, secretary; and W. S. Ward, faculty adviser.

The Prof And The Slide-Rule

"Yah," said the engineering student, "it it isn't practical, it isn't worth knowing."

"Intellectualism," said the professor in the January 13 Kernel, "is depriving students of emotion, of enthusiasm, of national spirit and passion."

And so we see that the centuries-old argument has come up again, with the scientist and the poet standing toe to toe and making faces at each other.

This time, the battleground is the twentieth century American college.

That everything is not exactly right in higher education nowadays is pointed out frequently by observers and commentators, who charge that the current crop of students—referred to, perhaps too often, as the What The Hell Generation or the Juke-Box Generation—are too cluttered by confusion, cynicism, shallowness, and general wishy washiness.

And at this point, many of them split. One side declares that the students are apathetic and over-objective because of the spirit of "intellectualism" which has taught them to look at everything from a tolerant, super-critical point of view. Its spokesmen deplore their lack of spirit, and their lack of moral judgment of the world around them, blaming science and intellectualism for teaching them "it's not our concern whether this is right or wrong, but just that it is so." They say America is cursed with a generation of "observers," content to watch, but unmoved to take part.

On the other hand, the scientists and "intellectualists" deplore just as highly the fact that hordes of students graduate with little more than a headful of theories, some vague ideals, wispy sympathies, a full stock of opinions but nothing with which to back them up. These students, it is charged, look so far ahead to Utopias and Arcadias that they never realize the down-to-earth, practical problems around them every day. Poetry, music, philosophy, art, and the other traditional attributes of the "liberal" education are impractical, of no use, and a waste of time. The problems of the world, they say, can only be solved by material things, and therefore only these things should be considered by education. "It isn't worth knowing."

The answer to this argument, it seems to us, lies, as it does so often, in a compromise between these two attitudes. An excess of one is just as narrow and false a stand as an excess of the other.

We can attest from experience that, as the scientists say, it is very possible for a person to

The Gruesome Results Of A Cartoonist Worried About Examinations

For Johnny Carrico Columnizing On A Columnist

Thirteen times I have started this column and thirteen times I have scrapped my journalistic efforts on John Carrico.

For this is one time that I have been caught with my words down. John and I started on The Kernel three years ago and it only seems proper and fitting that I tell him goodbye.

You see, he's the ex-author of The Sporting Way, and now Uncle Sam's material for a flying cadet. Laconically speaking, he's in the army now. At least it's only a matter of a few hours.

Columnists, especially collegiate columnists, would give their last pair of pants for a witty phrase or several original ideas.

But this time we're taking advantage of being a collegiate columnist for our own personal gain. We'll let down our hair for a few paragraphs, forget what cleverness that we might possess, and write, if you don't mind, what we damn please.

John, we hate to see you go. Every time that we gather at Father Gruner's establishment for a few choice morsels of food or milder beverage, we'll be thinking of you and your biting Irish wit.

Recently the attendance at the back table has been reduced noticeably. Already Mac (Wayne McKinney) has departed for the ranks. Fred Hill has a regular job and seldom has time to stop in and engage in our arguments. And before long John Ed's (Do I need to identify this fellow) draft number will be up and Windy (Harold Wing) will be a second home.

You'll remember that time when you and

Windy almost came to blows in Father Gruner's because of your criticism of his journalistic ability. And that trip we made to Birmingham to see the 'Cars play the Tide and I ran von around the nineteenth floor. . . . And those long rides back from Atlanta after seeing our boys drop a tough decision. . . . And the time that Bob Mcagher rolled up your sleeves shortly after we left Chattanooga and Windy and Joe Hodge had to separate you.

And how we used to exchange comments every afternoon in the gym about the progress of the team with Doc Radler, Babe Kimbrough, and Alex Bower.

Those are just a few of the incidents that you'll remember when you start to look for that Han in the sun, John.

Here's a slick trick told to us by persons that witnessed Saturday's Tennessee game down smoky Knoxville way. It seems as though the Vol floor had been heavily waxed the week before Saturday's game. The Vols had plenty of chance to accustom their play to the precariously slick hardwood, but the 'Cars, who weren't regulated to the highly polished surface, went skidding in the four directions.

The story is made even more complete with the added rumor that the Tennessee players washed their shoe soles in gasoline before the game which enabled them to secure a firm toe hold on the hardwood.

More of this later, however, when Baron Rupp returns from the Southland.

War Speech Records Released For Public

MUSICAL MUTTERINGS BY BILL PENICK

Early this month RCA Victor released a truly momentous recording. Realizing its public service value as a milestone in American history, the company released to the general public a ten inch recording of Franklin Delano Roosevelt's war message to Congress on Monday, December 8, 1941.

Recorded from the actual broadcast and released by permission of the White House, this record marks the first time an American war speech has been offered to the public in so realistic and permanent a form. It affords Americans the opportunity of hearing and re-hearing the President's inspiring words proclaiming the strength and right of the democratic nations, affirming our confidence and power in the greatest crisis the country has ever faced, and insisting clearly and determinedly the fateful: "I ask that the Congress declare . . . a state of war . . . between the United States and the Japanese Empire."

The record reproduces the exciting and colorful background of Congress in joint session at one of the most crucial periods in our nation's history. This is a record for every American to cherish—for himself, for his children and for his children's children.

GOOD WAR SONG

One of the best in the current batch of patriotic songs to reach our ears is Sammy Kaye's *Remember Pearl Harbor*. This one is sung by the Kaye Glee Club in a stirring march tempo, and may become another *Over There*. Some of the other war songs are so silly they might be classed as nursery rhymes. Such titles as *Let's Knock The 'Hit' Out Of Hitler*, *They're Gonna Be Blowing Taps For All The Japs* and *We'll Knock The Japs Right Into The Laps Of The Nazis* are examples of these.

BLUES IN THE NIGHT

One of the best recordings made in recent months is the Benny Goodman Sextet pressing of *Blues In The Night*, a tune that promises to be one of the standouts hits of 1942. Aside from the fact that the tune is right in that solid blues groove, Benny's arrangement is one of the best. Peggy Lee's excellent vocal, Mel Powell's piano and Goodman's clarinet combine to make this a truly great side.

Reverse is an old Rodgers and Hart tune, *Where Or When*, with Peggy Lee's vocal again getting top spot. Both waxings are slow and both show the new BG sextet at its best.

Kernel Had It's Army Jokes During First World War, Too

By MARTHA DAVIS

"The heavy barrage of jokes about war and military training, now hitting the American public full force, had its counterpart during the first World War.

As the old issues of "Squirrel Food," famous Kernel humor column for many years, show, students of 1917 and 1918 were just as eager to pass off a quip of two at the expense of the doughboy as they are today.

Here are a few of them—corny and clever—that found their way into the Kernel.

Fair One: "What is the baby blue cord on your hat for?"
Sammy: "I'm in the infantry."

I've told my khaki lad good-bye, I fear my life is wrecked; but I could not kiss a soldier And keep my self-respect.

Three stamps upon our letters Will knock the Germans silly; For every lick we give the stamps Becomes a lick for Willy.

"The Kentucky Colonel says, If Satan is the 'King of Liars' then the Kaiser must be his Prime Minister, huh?"

Girls, help to win the war! Wear short dresses and low necks. Your health may suffer, but you are saving cloth for the soldiers."

THE SOLDIER'S PROPOSAL

I'll love you dear, cried he
I'm better and far worse

Psychopathology And Hitler

FREE LANCE BY BOB WORTH

Adolf Schickelgruber—known to millions as Adolf Hitler—is a god-send to psychologists, psychiatrists, psychoanalysts, and what have you, who are having a field day dissecting him nowadays and who, at the same time, have an expectant audience hanging on every syllable.

The prevalent popular opinion appears to be that Hitler is some sort of illiterate, uneducated moron, who, when not safely tucked away in a padded cell, is merely tolerated by the Nazi hierarchy as a pet to show stray curiosity-seekers and foreign correspondents, and as a figure-head for the German masses to kowtow to.

It is even seriously suggested by some misguided zealots that Hitler has been assassinated, and quite dead, to these many weary months, and that doubles (not including Charlie Chaplin, we hasten to add) have neatly assumed his place when Der Fuhrer has been trotted out to deliver an occasional philippic to soothe the honest Aryan.

HE'S NO DUNCE

We maintain that Adolf, though uncultured and uneducated in the formal sense, is of superior intellect to the common run of men; but his whole personality and existence have been warped by complexes, neuroses, and prejudices. In short, although not afflicted with quite all the horrors of the Freudian menagerie, Herr Hitler is a decidedly queer personage. He possesses

the fanaticism of an evangelist, the intolerance of a prohibitionist, the asceticism of a saint, and the genius of a Nietzsche.

Let us examine his childhood and youth for the source of this. We see at once an abnormal family life in which intense hatred of the father is counterbalanced by a passionate love for his mother. This mother fixation has endured long after her death and is, of course, a plausible explanation of his life-long celibacy.

To quote John Gunther: "He had an Oedipus complex as big as a house." All of his sexual energy has been sublimated into oratory and fanaticism for the "Cause."

Hitler's mother was a remarkable woman, far different from the stolid simple peasant types of Central Europe. From her, young Adolf was imbued with a great ambition, later perverted into an egoistic sense of historical mission. Throughout his life he has followed a compensatory attitude through which he has sought to justify himself in her eyes and to prove his right to independence, success, and dominance.

While not all fanatics are martyrs, all martyrs are fanatics; and Hitler is a good example of the latter, although "Messianic complex" may possibly be a more suitable description. His vanity, though extreme, is impersonal, for he sublimates it in fervor for the Divine Mission of the German nation.

The German is taught that he is destined to rule the inferior, non-Aryan races. His powers of oratory are well known, and to a non-German it is almost inexplicable how his speeches can sway the masses into emotional frenzies; but it is necessary to realize the principles of mob psychology and the mass inferiority complex of the German people brought about by the defeat in the World War, the Versailles Treaty, and post-war sufferings.

Of course, it is impossible in one short article to summarize all the material concerning Hitler and Nazism, and we propose to continue this series by elaborating further on other points.

Quick, Bold Change--Or Death

By PAT OLDHAM

Universities must meet the challenge of modern conditions by bold changes or face a disastrous drop in enrollment—these are the alternatives before collegiate America today, according to Dean W. B. Donham, in an article in the current Harper's Magazine.

If the nation's universities cannot mobilize as efficiently as the nation's army for the emergency cultural education may be superceded by strictly vocational training, he warns.

"Long before the present emergency there was clear evidence that the colleges and universities were out of step with changed social conditions. The draft may prove to be only the spark which is touching off an explosive decline generated by a number of less obvious factors." Dean Donham points out.

The author, present Dean of Harvard Business School with wide practical experience as an industrial executive, explains that the college is a middle-class institution. As middle-class incomes and living standards become lower and lower, the college must suffer accordingly. Many will hesitate to start an education which they may not be able to finish. In addition, the disappearance of gifts and endowments may lead to an education

Two Alternatives Face America's Liberal Colleges

national depression similar to that recently suffered by business.

COMPETITION AHEAD

Such a depression would mean cut-throat competition and eventually an uncontrolled, politically dominated state university. Colleges would find themselves with large plants, an expensive idle faculty, and a decreased income. These conditions can only lead to a lowered standard of education.

Today the average liberal arts student drifts through four, aimless years and emerges feeling restless and at loose ends. Here is your parlor punk who has learned only to debunk and criticize, to use words and theories rather than to work toward some definite goal.

Time worn contrasts between liberal and vocational education must be broken down, Dean Donham warns. With intellectual discipline must come the ability to stand on one's own feet during the present economic revolution. This ability is the strongest bulwark that democracy can build against autocracy.

It is my judgment that colleges

Woman's Book Club, Music Study Group To Meet This Week

The book club of the woman's club of the University will meet at 3 o'clock this afternoon in Patterson Hall.

Miss Marguerite McLaughlin, who was in New York during the holidays, will speak on "Seeing New York Theatrically." She will review some of the plays she saw while in New York.

The music group of the Woman's club will meet Wednesday night at 7:30 o'clock at the home of Mrs. Henry Moore, 438 Fayette park.

Mrs. James Martin is chairman of the program of (choral readings and group singing.

'Selectee Dance' Honors SAEs Called For Service

The members of Sigma Alpha Epsilon entertained with a "Selectee Dance" Friday night at the chapter house honoring the members of the fraternity who will leave soon for active service.

Guests of honor were Ellis Jones, Ben Lamason, Jim Masterson, Jack Tabor, and Ben Adams.

Rex Osteen was in charge of the arrangements for the party and the chaperons were Mr. and Mrs. R. M. Guthrie, Mrs. Alex Hall, Mrs. E. P. Lamason, and Mrs. Ballard Luxon, the SAE housemother.

Dates of the actives and pledges were Gene Ray Crawford, Polly McDonald, Virginia Wesley, Sara Bogen, Linda Mills, Ruth Bradford, Julie Landrum, Elizabeth Jones, Beverly Conner, Jane Richards, Joan Taylor, Betty McClanahan, Sarah Louise Milward, Lucy Meyer, Faye Wallace, Margery Schwartz, Betty Baynham, Catherine Gaines, Nancy Bottom, Nancy Clay Shropshire, Maybelle Marr, Mary V. Gibson, Barbara Rehm, and Jean Dezonila.

JIM WOOLDRIDGE

HENNY HELLENMEYER

These two are often seen on women's fashions in a very decided manner for Tom, the fashion columnist.

Collegians Say Thumbs Down On Hats, Nail Polish, Boots

By TONI

With men getting scarcer every day, UK coeds may begin picking out a man, then dressing to suit his fancy, and hoping . . .

If that's your plan, here are the likes and dislikes of two themselves—well-dressed campus leaders: Henny (swimming team captain) Hellenmeyer and Jim (Kernel news editor) Wooldridge.

Henny, who has the enviable reputation for looking immaculate and well-groomed at all times, likes the collegienne to be a lady, to present a poised and charming appearance, and to be capable of carrying on an interesting conversation. (She doesn't have to have a convertible.)

Jim, whose natural cashmere sweater influenced me in buying three imports over the holidays, pre-

fers tall athletic blondes who wear conservative casual clothes.

Both men approved the sweater, skirt and saddle shoe combination for campus. Sweaters should be moderate in fit—never baggy, they agreed.

NO HATS WOMEN!

"Hats worn on the campus are usually silly," reneged our swimming captain "but otherwise, the average college gal is not too radical in her selection." If girls must wear a head covering because of weather, kerchiefs are acceptable and ear muffs were deemed acceptable to Hellenmeyer.

Jim would make no concession to hats at any time but in the rain, and then he also checked kerchiefs.

Neither liked knee-length socks, but Henny granted that they could be tolerated if worn for cold-weather comfort, if they don't wear boots too. Our news editor was more vehement in his condemnation, declaring that he would rather see a girl wear trousers than knee-length socks.

DON'T SEE STOCKINGS

For date wear, it was agreed that women should wear high heels and hose. Henny took time here to air a pet peeve and condemn too-short skirts plus rolled stockings that aren't rolled out of sight.

Colors offered a difference of opinions. Henny said "yes to black—I think it looks nice on dates." Jim said "no" to "dark colors but not black."

"Some gals know how to wear jewelry, and some over do it, but it's o. k. when worn well," was the Hellenmeyer reaction to jewelry.

"Now," came the Wooldridge drawl, "Don't like jewelry of any kind at any time. Earrings, especially, remind me of Ubangi savages!"

PRO. CON NAIL POLISH

His theory against ornamentation was explained when he ventured that "nail polish and jewelry are manifestations of primitive instincts" and should be barred from modern usage.

Henny, on the other hand, liked bright nail polish. "If a girl has attractive hands," he said, "her manicure should point them out."

For evening Jim preferred the stinky decolletee formals to the fluffy type which found favor with Henny. Both voted a change in hair-do for evening with the upswipe style rating high. Candid dislike was shown for bangs at their mention.

"The average gal overdoes make-up, but not to a great extent," summed up the Hellenmeyer comment on the make-up controversy. The Kernel news editor, however, ruling out make-up entirely, reverting to his "primitive instinct" theory.

Cigarette fiends, termed also as "chain smokers" were chalked off by Henny who judges his girls on a personality-appearance basis rather than a strictly "Lana Turner" scale.

You ought to be a lot happier in February if you'll put a few of these suggestions into practice—now!

Defense Stamps Are On Sale At Post Office

Defense stamps of 15, 25 and 50-cent denominations are available at the campus post office, it was announced from the comptroller's office.

Purchase of the stamps will show that the University is co-operating with national defense, Comptroller Frank D. Peterson said.

If the demand is great enough, a purchasing station will be set up in the business office, he added.

When \$175 worth of stamps has been purchased, they may be exchanged for a bond. The latter will be valued at 25 dollars at maturity.

George Terrell, Helen Durst, Win Costume Prizes

With high collar, bow tie and short pants, not to mention slick hair with a middle part, George Terrell, Engineering senior, won first prize for men in the "best costume" contest Saturday night at the Gay Nineties Ball. Terrell was awarded a Ronson cigarette lighter by Lamp and Cross, senior men's honorary, which sponsored the dance.

Women's first prize was presented to Helen Durst, Lexington, who wore an authentic period gown in black with a black cape and large hat trimmed with a red ostrich plume. Her hair was dressed in the style of the gay nineties, with a huge pompadour on the forehead. Her prize was a leather compact.

UK Men May Avoid Such 1900 Styles As Peg Leg Pants

By RICHARD STOFFER

Men's styles returning to the year 1900 because of a wool shortage? Not at the University, it seems, because Lexington merchants are supplied with current full-cut styles which will last at least another year and a half, a Kernel reporter has learned in a series of interviews.

Limestone wolves had been in a dither since last week when it was announced that shortages in clothing materials would end the era of the double-breasted coat, the vest, and the full cut pants, with pleats. In their stead were to come peg leg pants, scant lapels and the other impedimenta of the 1900 duds. This report should relieve them.

Several of the downtown stores have reported increased sales in men's wear since the announcement of the curtailment program, but generally the out-look for current styles in Lexington is rather bright. The store executives say that their stocks can stand at least a year and a half of normal sales before a shortage develops. After that—well, bring on your 1900 style!

Dr. C. C. Ross Tells How To Review For Final Exams

By LEWIS BONDURANT

When it comes to the crux of the matter of preparing for, and taking, final examinations, Dr. C. C. Ross, head of the department of educational psychology, can set you straight—in a hurry!

For example, peruse some of the following suggestions for doing something about that standing that is threatening to dip below a spine-chilling one:

In reviewing, a student should not try to read the book again. He should read everything in italics, heavy print, and perhaps the beginning and ending of each chapter.

When a student receives his list of examination questions he should first glance hastily over it to get the scope of the questions. He should answer first those he knows exactly and fully, leaving those that puzzle him until the last, when he can work over them slowly.

"Think before you write!" Professor Ross, who has conducted student forums on study methods, suggests, too, that a student would gain in his preparation if he would "prepare an examination of his own," and then meet with two or three others of the class for a comparison of examination questions.

And if you have a feeling that a review of your course is a waste of time, just let Professor Ross tell you "There is no getting around that a review is essential even though you have done a steady job of studying!" And when you get around to reviewing don't overlook the notes you have taken in class or have pinned in the margins of your text, he adds.

You ought to be a lot happier in February if you'll put a few of these suggestions into practice—now!

Records Program To Feature Dorsey

Tommy Dorsey's band will be featured at the regular weekly Modern Music concert at 3:30 p.m. today in the Carnegie Music room of the Union building, it was announced yesterday.

Such recordings as "On the Alamo," "Swing High," "I Think of You," "Who Can I Turn to You," "For You" and "Yes Indeed" will be played, Bill Penick, in charge of the concert, said.

The 30-minute recordings program is sponsored by the Music committee of the Union board.

The weekly Friday afternoon panel discussions on world news will be discontinued until after the final examinations, it was announced by the Union board. The next forum is scheduled for Friday, February 6.

JACK MCNEAL

has been elected president of Delta Tau Delta fraternity.

Delta Tau Delta Announces Officers

Delta Epsilon chapter of Delta Tau Delta announces the election of the following officers:

Jack McNeal, of Ashland; president; Carlisle Myers, Lexington, vice-president; Robert Kagin, Frankfort, treasurer; Harrison Dixon, Henderson, corresponding secretary; William Glass, Irvine, recording secretary; and Thomas MacDonald, Flemingsburg, guide.

REVENUE AGENT WILL GIVE AID ON TAX RETURNS

Comptroller's Office Will Have Record Of Yearly Earnings

Arrangements have been made with the Department of Internal Revenue to send an agent to the University campus sometime between February 1 and 15, Frank D. Peterson, University comptroller, announced yesterday.

The agent will assist all persons employed by the University who are required to make out income tax returns. "University staff members will be able to make returns to the agent and will be thus saved a trip downtown to the internal revenue office," Peterson said.

The office of the comptroller is preparing a record of the earnings of all employees of the University during last year. This record will be available in the next two or three days for those persons who work part time and may not know their exact total income.

All single employees making a total income of \$750 a year and all married employees making \$1500 a year must file income tax returns.

The definite date when the agent will be on the campus will be announced later.

TRUSTEES

(Continued from Page One)

ton was appointed part-time assistant professor in social work for the second semester of the current school year.

Col. Paul Paschal was appointed professor of military science and tactics and commandant, effective on or about March 1 when Col. Howard Donnelly, the retiring commandant, terminates his tour.

Dr. T. M. Hahn, associate professor of physics, was granted leave for an indefinite period without pay in order that he may work as radio communications instructor at the Lexington signal depot at Avon.

Other leaves granted included those of Miss Mary Hood Gillaspie, home demonstration agent in Boone county, four months' extension because of illness; Harold F. Miller, assistant in agronomy, called to military service; Leslie Holmes Ellis, county agent in McLean county, called to army service; H. Grady Sellards, fled agent in animal husbandry, called to army service, and Ernest L. James, Winchester, county agent in Clark county, called to army service. The three last-named are reserve officers and have been ordered to report for active duty.

Dr. Ladd N. Loomis, assistant veterinarian in the animal pathology department, left January 1 for active military duty.

Changes in status were reported for Oble H. Reid, named assistant county agent in Barren county and Mary Ellen Murray, advanced from assistant home demonstration agent to full-rank agent.

Members of the committee present for today's meeting included Judge Richard C. Stoll of Lexington, chairman; James Park, Lexington; Richard P. Hobson, Louisville, and Lee Kirkpatrick, Paris.

W. Gayle Starnes, secretary of the board; Frank Peterson, comptroller and Dr. Donovan also attended.

ALUMNI NEWS

THEN and NOW

PERSONALITIES

Bar Association Elects Odear

Robert M. Odear, graduate of 1928, is the newly-elected president of the Lexington Bar association, according to information received at the Alumni office.

Named to replace him as first vice president was Rufus Lisle, University graduate of 1932. Other officers are Leer Buckley, ex-student, second vice-president, Nathan Elliott Jr., class of 1902, treasurer; and Lasserre Bradley, 1933 graduate, secretary.

Gayle A. Mohney, retiring president of the association and 1928 graduate of the University, presided at the election meeting.

Odear, who received his bachelor-of-laws degree from UK in 1930 and a master-of-laws degree from Yale University in 1931, began practice in Lexington in June, 1931.

Dorroh Promoted To Major's Rank

Glen Urey Dorroh, UK graduate of 1927 and assistant corps area surgeon at Fort Hayes, Ohio, has been recently promoted to the rank of major. Major Dorroh, a native of Princeton, received his pre-medical training at the University and obtained his M. D. degree from the University of Louisville in 1941. His internship was served at Good Samaritan hospital, Lexington.

Major Dorroh has been on active military duty since 1940. Prior to that time, he served as medical officer with various units of the CCC. At present he is a staff member of the army hospital at Fort Hayes.

Still-Schwartz Wedding Announced

Mr. and Mrs. W. W. Still, Orlando, Florida, announce the marriage of their daughter, Frances Lucinda, UK graduate of 1940, to Peter Raymond Schwartz, son of Austin F. Schwartz of Garmanla, W. Va.

Mrs. Schwartz, formerly of Lexington, received an A. B. degree in history from the University. Schwartz is a graduate of Fairmont State Teachers college, W. Va., where he was a member of Theta Sigma Chi. He is now with the United States air corps, stationed in Orlando.

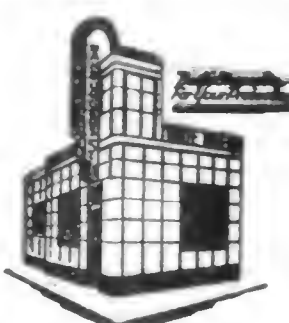

The mailing address of Mr. and Mrs. Schwartz is Goss apartments, South street, Orlando, Fla.

McDowell-McLoney Wedding Announced

Mrs. Marshall McDowell announces the marriage of their daughter, Marshall, to Lieutenant Nelson Hamon McLoney, former University student and son of Mr. and Mrs. L. C. McLoney of Cynthiana, January 7, 1942. Mrs. McLoney is a graduate of the woman's department of Centre college. Lieutenant McLoney attended Virginia Military Institute as well as the University. He recently received "wings" in the U. S. Army air corps and is now stationed in Albuquerque, N. M. He was transferred to his present station from Barksdale, field, La.

Williamson Named Paris Rector

The Rev. Harold C. Williamson, University graduate of 1931, will return to the Diocese of Lexington in March to accept the rectorship of St. Peter's church at Paris and to serve as priest-in-charge of Holy Trinity church, Georgetown. He will also be editor of the "Diocesan

Cats Falter Before Vols, 46-40, Despite Allen's Great Playing

Blue Performer Leads All Scorers As Parents Watch

By JIMMY BROWN
Kernel Sports Editor

Ernie Allen treated 2200 Knoxville basketball fans to a spectacular scoring exhibition Saturday night as he made five field goals and seven foul shots good for 17 points, missing only one shot from the floor and one from the foul line throughout the entire game.

Included in the capacity crowd that packed Alumni Memorial auditorium were Allen's mother and father, who had journeyed from nearby Morristown to see him perform.

However, his magnificent performance was not enough to overcome Tennessee's defending SEC champions, and the Cats went down to a 46-40 defeat in their initial contest of the season.

CATS STAY CLOSE

Although they stayed close all the way, the Cats were never able to pull in front of the loop-leading Vols, managing to draw even on only one occasion early in the contest. It was the great play of Bernie Mehen, Tennessee's veteran senior forward, who tallied 13 points, that kept the Maurens in front of the Cats.

The game was played on a floor made slick by dancin' wax, which had been used for a dance held several days previous to the game. Midway of the first half the gym floor began to look as if a snowstorm had hit it as several boxes of rosin, dumped along the sidelines for the player's use, began to get scattered over it. Several of the Cats' bad passes came as a result of the slippery underfooting. However, the floor seemed to have little effect on the Volunteers, who had been practicing on it most of the week.

BREWER AIDS

Allen received capable assistance in his one-man campaign against the Vols from Mel Brewer, who scored nine points while playing a whale of a ball game. Brewer did a superb job in holding Dick Mehen, high-scoring Vol center, to two field goals. Previous to tonight's fray, the sophomore star had piled up 47 field goals in his team's first nine games.

Tennessee jumped into a 5-1 lead immediately after the start of the game, but baskets by Allen and Splaine evened things up for the only time during the game. Balltasaris then hit a long, and Bernie Mehen connected for three points,

ERNE ALLEN . . . playing before Ma and Pa, showed fellow-Tennesseans how to put the ball in the basket, scoring 17 points.

and the Vols were never headed. From then on the Cats stayed two or three points behind. Shortly before the end of the half England sank a foul shot, and the Cats pulled up to 20-22, but Herman hit a long and Dick Mehen and Clark dumped in free tosses to widen the margin to 26-20 at halftime.

The Cats scored first in the last period when England rebounded one in to make the score 22-26, but the Vols pulled ahead again, 31-24, and the Ruppmen never threatened seriously thereafter. With four minutes left Tennessee widened the margin to 46-33, but Allen took over again, and his six points, together with Tico's gratis toss, closed the gap to 46-40 as the game ended.

GAME IS ROUGH

The game was a rough affair, with referees Tehan and Jackson calling a total of 39 fouls. 24 on the Wildcats and 15 on the Vols.

Kentucky's accuracy from the foul line was exceptional as they made good 14 out of 17 tries. Tennessee, usually consistent on gratis throws, missed 10 while sinking 12. Several times in the waning minutes of the game the Vols elected to take the ball out of bounds rather than shoot the free throw.

Tennessee's organized "heckler's row" was reduced to a mere whisper compared with the verbal going-over the Wildcats received when they visited Knoxville last year. Although the "hecklers" were there with occasional catcalls being hurled from the gallery, a plea by University of Tennessee's president kept them from operating in full force.

The Cats left Knoxville Sunday for Athens, Ga., where last night they met Georgia's Bulldogs, defeating them 51-26. Tonight they will tangle with Georgia Tech. They will return home tomorrow, and will play Mexico university in Alumni gymnasium, Saturday night.

The lineups:

Kentucky	FG	FT	PF	TP
Allen, f	5	7	3	17
Splaine, f	0	2	1	2
Tico, f	0	3	1	3
White, f	1	0	3	2
Brewer, c	4	1	4	9
King, c	0	0	2	0
Akers, g	1	0	3	2
Staker, g	1	0	4	2
England, g	1	1	2	3
Lander, g	0	0	0	0
Totals	13	14	24	40

Tennessee	FG	FT	PF	TP
B. Mehen, f	5	3	2	13
Herman, f	2	1	2	7
Clark, f	2	1	0	5
R. Mehen, c	2	3	2	7
Balltasaris, g	3	0	4	6
O'Neill, g	1	3	3	5
Cook, g	1	1	2	3
Totals	17	12	15	46

Free throws missed—Kentucky: Allen, Brewer, Akers, Tennessee: B. Mehen (2), D. Mehen (2), O'Neill (2), Clark (3), Cook. Score at half—Tennessee 26, Kentucky 20. Officials—Tehan (Xavier); Jackson (Middle Tennessee).

DOWNING SAYS FIVE SUN ECLIPSES A YEAR POSSIBLE

Semester's Last 'Open Class' Held, No More Announced

Because of the sun and the moon's velocity in travelling, their respective paths in the universe, there can be only five total eclipses of the sun each year, Dr. Downing, professor of mathematics and astronomy, explained in his open class lecture Friday.

"It is only in certain parts of the world that men are able to see total eclipses, and these eclipses last about seven and one-half minutes each," Professor Downing said.

His remarks were on the subject, "Eclipses of the Sun and Moon," part of his regular course in mathematics and astronomy, which meets for one of its periods at the fourth hour on Friday.

Dr. Downing's lecture was to the second arts and science college "open class" since the Christmas holidays.

NO MORE ANNOUNCED

It was also the last in the series for this semester. The arts and science college office has not announced plans for a similar series in the future.

Demonstrating astronomical principles with models, Dr. Downing said that when a ring of light is seen around the blacked-out sun in an eclipse, the position is known as a partial eclipse, or annular eclipse.

The total eclipse is a result of the moon traveling between the sun and the earth in their plane, he said, adding, "There will be no eclipse of the sun in 1942."

A lunar eclipse is caused by the moon passing into the earth's shadow, the lecturer continued.

TOTAL ECLIPSE OF MOON

This eclipse has four "contacts," and it is the second two "contacts," or stages where the moon is completely inside the shadow, that we have the total eclipse of the moon.

He mentioned the fact that the sun requires 365 1-2 days to travel around the earth, while the moon takes only 29 1-2 days.

QUARTER SYSTEM

(Continued from Page One)

sirable in gearing the University into the total war effort of the nation.

3. The University will establish at once an information center. This center will be under the direction of a carefully selected committee. It will provide for the study and discussion of immediate and post-war problems.

The headquarters of this center will be in the Library, where a carefully selected library of books and pamphlets will be assembled on our war aims and objectives and the aims of the peace. This committee will direct forums and other discussion groups on the campus of the University with a view of helping our students to understand and be well informed about world affairs and our relation to them. The radio will be used by the committee in interpreting desirable information to the public.

4. The University Defense Council for Men has been active for more than a year. It will be enlarged so that an informed staff member may be on duty practically all the time to answer questions about registration, reporting for the draft, deferments, and other problems which the young men of the University have and on which the need advice. The committee will furnish information on opportunities in the different branches of the service and how young men may qualify for the various services. It will continue to provide forums, classes in first aid and home nursing, and to offer in all possible ways opportunities for women to participate in the war effort.

6. The University urges all its staff and student members to cooperate in programs of building civilian morale, in supporting the Red Cross, in purchasing government stamps and bonds, and in all other programs of the government to provide a successful all-out war effort.

LEAVES FOR FACULTY

7. The University will grant any member of the permanent faculty who enters the services of the armed forces a leave of absence for the duration of the war.

8. The emphasis on the correction of physical defects and the strengthening of health and character generally will be continued and further encouraged and promoted by the University.

9. The University will continue to insist on high standards of work and accomplishments by both faculty and students with no diminishing of effort during the critical period.

10. During the war period the recreation of students and faculty, and the general social program of the University will not be neglected, but social events will be relatively simple and inexpensive.

11. The deans, personnel officers, assistant deans, heads of departments, professors, advisers, and sponsors will continue to give advice and counsel to individual students on their personal problems. Their offices will be open to all students who desire to come for guidance, and students will be encouraged to talk over their problems with the proper officials.

12. As part of the continual effort to interpret war aims and problems, the University will arrange for assemblies and convocations for all students.

13. The University will plan the wisest possible use of all its material and human resources to the end that every assistance be given to the accelerated program of education on the campus and to the nation's war effort. Economy in the use of laboratory materials, supplies, light, and all other materials basic to the war effort will be practiced.

14. The University offers to the government the use of its plant, including laboratory facilities and its entire physical resources, for providing for the special training or instruction of groups of the armed forces or other trainees closely associated with the armed forces who may from time to time be sent here. The services of the faculties of the six colleges and of the Graduate school are offered to the government to provide instruction and training for such groups.

KERNEL SPORTS

Sporting Way

BY JOHNNY CARRICO

January 20

Dear Jo,

You remember Wynne McKimney who went to the army about a week ago? Well, Wynne used to sing a little song that seems sort of appropriate right now. It went like this:

I'm off to the wars,
To the wars I must go,
To fight for my country and you, dear,
Bright sunny days will soon fade away,
So remember what I say and be true, dear

Yeah, I'm off to the wars, too. Sometime early next month I'm going into the air corps.

Sports writers aren't supposed to get sentimental. They're traditionally reputed to be jaded and calloused to the heart-catching element. As far as I'm concerned, that's so much wind up the chimney. Because I guess I'm as sentimental as the next guy.

I like to think of the fun I've had in the three and a half years I've spent here. I've known some really fine people—guys like Harold Winn, John Ed Pearce, Roy Steinfort, Bob Aumores, Bob Meagher, Gny Rappleyea, and lots of others. They were indeed boon companions and we never lacked laughs.

I hope we all get through this business, have good jobs, fat wives, and funny-looking children.

I won't forget the boys on the athletic teams; they're as good a bunch of men as you could find. I'll remember Mr. Rupp because I think that he's the greatest coach in the world (whether he has a team or not). I'm very much in debt to Mr. Skively and the other coaches, for they treated me with every possible consideration.

Jimmy Brown and Windy will take over my place and I'm sure that they can do a whole lot better than I have done. I hope they have plenty of by-lines with all kinds of space for their copy.

I'd like to recall some of the thrills I've had while following Wildcat teams but there are so many of them that it would take too long. They were swell and I'll let it go at that.

"Parting is such sweet sorrow," Shake said, so I won't prolong the agony. I'll just fold my little tent and like a gypsy steal away in the twilight. Or to put it plainly, I'll get the hell out of here—and pronto.

I've been warned against ending my farewell with anything that includes the traditional newspaper parting, 30. So I'll just say.

With love,

Johnny

MATERIALS LAB NEARLY FINISHED

The testing laboratory for state highway materials should be completed in about 90 days, providing the panel for the electrical fixtures is obtained in time. J. S. Skinner, contractor, said yesterday. The panel has not been received because of priorities.

There is still not enough metal window sash, but that should be easily gotten, Skinner stated. Already on hand are structure metal, brick and structure tile.

The concrete on the first floor has been poured and the forms for the pouring on the second floor have been erected. There will be a small penthouse atop the second floor where the elevator will run.

Construction is being slowed up now until the ground thaws enough to run the heating pipes from the Home Economics building to the new construction.

Ten to 15 men and a foreman work on the building daily.

A friend was trying to make a touch with the news boy in front of the bank building. The boy refused by saying "I have an arrangement with the bank—they won't sell papers if I won't make loans."

6 P. M. TODAY IS ENTRY DEADLINE FOR BASKETBALL

Teams Expected To Practice Once A Week

Six o'clock tonight is the deadline for entries in the intramural basketball league. Play will not begin until after the start of the second semester, but teams entering the league are expected to practice at least once a week until that time.

Independent teams are urged to enter the league. All the entries so far have been in the fraternity division.

SAE won the free throw tournament with a total of 168 points. Runner-up position went to Alpha Gamma Rho with 162 points and Phi Kappa Tau finished third with 161.

Second round competition in the handball tournament is now in progress. Results are due Thursday.

Four professors of physics at Cornell university have left the campus to take defense positions.

DON'T STOP AT MURDER!

A newspaper is an accurate reflection of what today is doing with people . . . and what people are doing with today.

Murder is big-type news. So is a bank stick-up. And so is the dedication of a new library, or the launching of a new ship, or the employment of hundreds in reviving industry.

But you have read only half of the story, if you stop at murder. In our advertising columns can be found news in its most authentic sense.

What are people wearing? What are they eating? Where are they going? How are they going? Why this style, and why that vogue? When is the time to build? Who has the latest? How much does it cost?

Answers to these and like questions give you real information . . . news . . . about this business of modern living. And you will find these answers by carefully reading the advertisements in this newspaper.
